/JEAN B. FLEURANTIN/
 Primary Examiner, Art Unit 2162

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The Examiner initiated a call to the Applicant to clarify the language of "Programmable Streaming Data Processors (PSDPs)" set forth in the independent claims, since the "Programmable Streaming Data Processors (PSDPs)" is used to perform a join operation, where "in which a selected PSDP performs a join operation, where the field values being joined have a small range of values, so that the presence or absence of a particular value can then be encoded as a bit within a sequence of bits, whose position within the sequence corresponds to the field value". No agreement was reached.
